## LUCID...original, 10, 20, 30 series

The original design of Lucid was a black plastic back that offered a true “passive” ergonomic chair with its patented mechanism and center-pivoting back. This design allowed for full body movement mimicking every twist and turn of the user’s body.

Then a marriage of the webbed back and Lucid mechanism created the Lucid 10. It offers the comfort of the Webb Chair but with different aesthetics and mechanism.

Davis finished the series with two additional backs that offer larger scaled chairs with a more executive appeal. The Lucid 20 and Lucid 30 Series has a wider and deeper seat in either an ultra mid or ultra high back heights. Lucid 20 and Lucid 30 also have a more tapered arm and back rail design, along with a larger castered base.

To complete this program two new back options were added along with the webbed back offering — Upholstered and Knitted. All three back styles are available on Lucid 10, Lucid 20, and Lucid 30 Series.

## LUCID...the family

With the new additions of the Lucid 20 & Lucid 30 Series, Davis has created a complete “family” of chairs for the Lucid Series. This family offers a range of back designs — webbed, upholstered, and knitted. This series also is available in a variety of chair sizes to suit individual needs in conferencing, task, and executive levels.

Lucid 10  
webbed back

Lucid 11  
upholstered back

Lucid 12  
knitted back

### Lucid 10 Series...

- ...webbed back
- ...upholstered back
- ...knitted back
- ...black plastic arm cap standard
- ...short or long upholstered arm cap options
- ...synchro-tilt mechanism option

Lucid 20  
webbed back

Lucid 21  
upholstered back

Lucid 22  
knitted back

### Lucid 20 Series...

- ...larger scale ultra mid back
- ...webbed back
- ...upholstered back
- ...knitted back
- ...tapered arm with black plastic insert
- ...leather upholstered inlay option
- ...synchro-tilt mechanism option

Lucid 30  
webbed back

Lucid 31  
upholstered back

Lucid 32  
knitted back

### Lucid 30 Series...

- ...larger scale ultra high back
- ...adjustable headrest
- ...webbed back
- ...upholstered back
- ...knitted back
- ...tapered arm with black plastic insert
- ...leather upholstered inlay option
- ...synchro-tilt mechanism option

### LUCID ...webbed backs

Now available on all Lucid 10, Lucid 20, and Lucid 30 Series are nine webbing selections. This flexible woven back is constructed of a special webbing tape developed with DuPont originally for the Webb Chair Series. The body of the tape is composed of two-ply polyester yarn chosen for resistance to staining and abrasion, cleanability, ease of dying, and colorfastness.

The elastomer component (DuPont LYCRA® spandex) is wrapped with the polyester and adds superior, long term performance and resilience.

This combination of materials conforms with the user's movements in a new way that attains the highest level of comfort.

**Lucid 10, 20, and 30 Series Upholstered Option**

The fully upholstered style is available on the three series as Lucid 11, Lucid 21, and Lucid 31. This upholstery treatment has comfort wrinkles on the front for added comfort in the back support. A thin profile is maintained through a special interior construction that has integrated support supplied from webbing straps. Most textiles and leathers may be specified for this upholstery treatment.

Comfort Wrinkles with Fully Upholstered backs

## LUCID ...knitted backs

As an alternative to the webbed back, Davis has engineered a new type of knitted back that offers the same individual back support as the original webbed back. The back is knitted like a sweater in one-piece with the same polyester wrapped Lycra® yarns as used in the original webbing.

The back support is achieved through the stretch that this fiber inherently brings to the design, and is an alternative to the visual pattern the webbed back offers. It is available only in black.

## LUCID... arm styles

The sleek radius arms enhance the clean, classic design of the Lucid 10 through 12 models. Castered base chairs are standard with black plastic arm caps, which offer extra protection for the arm. As options, the radius arms may be specified with hand-sewn long or short leather wrapped arm covers.

Lucid 20 and Lucid 30 Series has tapered arms that add a unique dimension to the overall design. Scaled larger for the enhanced chair size these arms offer a black plastic insert as standard. Optional upholstered inlays of leather over high density foam are also available.

Hand-sewn Arm Covers
