2012 Aero Price List

Designed by Liévore/Altherr/Molina

Licensed from Sellex

Effective February 1, 2012

Cleaning Instructions

Anodized aluminum, such as used on Aero, provides an attractive and highly durable surface, which requires only minimal maintenance.

- Rinsing or cleaning with mild soap or detergent and water solution is normally all that is required to keep the anodized aluminum surface looking good.
- Mild abrasive cleaners will remove more difficult deposits but care should be taken not to create a localized change in the general sheen of the piece.
- Harsh acidic or alkaline cleaning solutions should be avoided.
- Solvents should be used with care as some may stain the surface. Using any cleaner on a small, less visible test surface first is always a good idea if it has not already proven by experience to be safe.
